

TAPP project description. A discussion of the assistance requested that includes the elements listed in Section 203.10 of this part. The project description should contain sufficient detail to enable the Department of Defense to determine the nature and eligibility of the project, identify potential providers and estimate costs, and prepare a statement of work to begin the procurement process.

Technical assistance. Those activities specified in §203.10 of this part that will contribute to the public's ability to provide input to the decision-making process by improving the public's understanding of overall conditions and activities. Technical assistance may include interpreting technical documents; assessing technologies; participating in relative risk evaluations, understanding health implications; and, training.

Technical assistance does not include those activities prohibited under Section 203.11 of this part, such as litigation or underwriting legal actions; political activity; generation of new primary data such as well drilling and testing, including split sampling; reopening final DoD decisions or conducting disputes with the Department of Defense; or epidemiological or health studies, such as blood or urine testing.

Technical Review Committee (TRC). A group comprised of the Department of Defense, EPA, State, and local authorities and a public representative of the community formed to meet the requirements of 10 U.S.C. 2705(c), the Department of Defense Environmental Restoration Program. Primarily functioning to review installation restoration documents, these committees are being expanded and modified at installations where interest or need necessitates the creation of a RAB.

§ 203.4 Major components of the TAPP process.

(a) The Department of Defense will issue purchase orders to technical assistance, facilitation, training, and other public participation assistance providers subject to the purchase limit per order as resources continue to be available. If multiple purchase orders are needed to assist community mem-

bers of a particular RAB or TRC, the combined sum of these purchase orders cannot exceed \$100,000 or, during any one year, the lesser of \$25,000 or 1 percent of the installation's total projected environmental restoration cost-to-complete. Note that these limitations refer to the maximum allowable technical assistance funding per RAB/TRC. Resources available within a given year may vary. These limitations apply unless a waiver is granted by the DoD Component Secretary or equivalent for the installation in question. The \$100,000 total and \$25,000 annual limitations may be waived, as appropriate, to reflect the complexity of response action, the nature and extent of contamination at the installation, the level of activity at the installation, projected total needs as identified by the TAPP recipient, the size and diversity of the affected population, and the ability of the TAPP recipient to identify and raise funds from other sources.

(b) Community members of the RAB/TRC will provide a description of the services requested (TAPP Project Description) and, if desired, the names of one or more proposed technical assistance providers to the DoD RAB Co-Chair, who will ensure the application is submitted to the installation commander or other designated authority and to the appropriate DoD contracting office. Technical assistance providers proposed by the community members of a RAB or TRC at each DoD installation that meets the minimum set of organizational qualifications guidelines provided by the Department of Defense in §203.12 of this part will be added to the governments list of bidders for the proposed procurement.

§ 203.5 TAPP process.

This section provides an overview of the TAPP process. Specific details referred to in this section can be found in subsequent sections of this part.

(a) *TAPP funding.* Funding for this TAPP program will come from the Environmental Restoration Accounts established for Army, Navy, and Air Force for operational installations. The funding for Defense Agencies' operating installations will be from the Defense-Wide Environmental Restoration Account. Funding will be from the

component's base closure account for transferring or closing installations. Funding for Formerly Used Defense Sites will come from the Environmental Restoration Account established for Formerly Used Defense Sites. After justification of the TAPP proposal, each DoD Component will make funds available from their individual installation's environmental restoration or BRAC accounts, considering a number of factors related to the restoration program at the installation and its impact upon the community. These factors include, but are not limited to:

- (1) Closure status.
- (2) Budget.
- (3) Installation restoration program status.
- (4) Presence (or absence) of alternate funding.
- (5) Relative risk posed by sites at the installation.
- (6) Type of task to be funded.
- (7) Community concern.
- (8) Available funding.

(b) *Identification of proposed TAPP project.* Eligible applicants of RABs and TRCs, established in § 203.7 of this part, should determine whether a TAPP project is required to assist the community members of the RAB or TRC to interpret information regarding the nature and extent of contamination or the proposed remedial actions. Eligibility requirements for TAPP projects are described in §§ 203.10 and 203.11 of this part. In keeping with the requirements of 10 U.S.C. 2705(e), the RAB or TRC must be able to demonstrate that the technical expertise necessary for the proposed TAPP project is not available through the Federal, State, or local agencies responsible for overseeing environmental restoration at the installation, or that the selection of an independent provider will contribute to environmental restoration activities and the community acceptance of such activities. In addition, the Department of Defense encourages the RAB or TRC to seek other available sources of assistance prior to submitting a request for TAPP in order to preserve limited resources. These sources include DoD's installation restoration contractor, or other DoD contractors or personnel, EPA or state

regulatory personnel, volunteer services from local universities or other experts, or assistance from state and local health and environmental organizations.

(c) *TAPP project request.* The RAB or TRC should notify the installation of its intent to pursue TAPP upon the determination that other sources of assistance are unavailable or unlikely to contribute to the community acceptance of environmental restoration activities at the installation and should prepare a formal request specifying the type of assistance required and, if desired, one or more sources for this assistance. Details concerning this request are stated in § 203.9 of this part. The RAB or TRC must certify to the Department of Defense that the TAPP request represents a request by a majority of the community members of the RAB or TRC. The RAB or TRC should ensure that the request meets the eligibility requirements specified in §§ 203.10 and 203.11 of this part. Furthermore, the RAB or TRC may outline additional criteria for the Department of Defense to consider in the selection of a provider (such as knowledge of local environmental conditions or specific technical issues, a prior work history within the study area which has relevant specific circumstances or unique challenges, or other relevant expertise or capabilities), keeping in mind that providers must meet the minimum technical qualifications outlined in § 203.12 of this part. The formal request should be submitted to the installation commander or designated decision authority, either directly, or through the DoD RAB Co-chair. The installation commander, or other designated decision authority, will review the proposed project to determine whether the proposed project conforms to the eligibility requirements. If the installation commander, or other designated authority, fails to approve the project request, the rationale for that decision will be provided to the RAB/TRC in writing.

(d) *Purchase orders.* Upon receipt of a completed TAPP request, the installation will begin the procurement process necessary to obtain the desired services by means of a purchase order

Office of the Secretary of Defense

§ 203.9

or will forward the request to the contracting authority designated by the DoD Component to act for that installation. The government is required to follow the rules and regulations for purchase orders as outlined in the FAR (48 CFR part 13). As a result, the government cannot direct awards to a specified supplier unless the procurement is under \$2,500, and then only if the cost is comparable to other suppliers. For procurements over \$2,500 but under \$100,000, the acquisition is reserved for small businesses, unless there is a reasonable expectation that small businesses could not provide the best scientific and technological sources consistent with the demands of the proposed acquisition for the best mix of cost, performance, and schedules. Furthermore, the award must be on a competitive basis. In addition to proposing potential providers, the application for technical assistance may indicate specific criteria or qualifications that are deemed necessary by the RAB/TRC for the completion of the project to their satisfaction. This information will be used to assist the Department of Defense in preparing a bidders list. The Department of Defense will solicit bids from those providers meeting the criteria and will select a provider offering the best value to the government. Should the procurement process identify a qualified respondent other than the proposed provider(s) identified by the RAB/TRC or fail to identify any qualified respondents, the RAB/TRC will be consulted prior to the award of a purchase order. If the Department of Defense determines that the TAPP request represents an eligible project for which no funds are available, it will ask the RAB or TRC to specify whether the project should be reconsidered upon the availability of additional funds.

(e) *Reporting requirements.* The applicant must assure that copies of delivered reports are made available to the Department of Defense and must comply with the reporting requirements established in § 203.14 of this part.

§ 203.6 Cost principles.

(a) Non-profit contractors must comply with the cost principles in OMB Circular A-122. Copies of the circular

may be obtained from EOP Publications, 725 17th NW, NEOB, Washington, DC 20503.

(b) For-profit contractors and subcontractors must comply with the cost principles in the FAR (48 CFR part 31).

§ 203.7 Eligible applicants.

Eligible applicants are community members of RABs or TRCs. Furthermore, the RABs or TRCs must be comprised of at least three community members to ensure community interests are broadly represented. The applicant must certify that the request represents the wishes of a simple majority of the community members of the RAB or TRC. Certification includes, but is not limited to, the results of a roll call vote of community members of the RAB or TRC documented in the meeting minutes. Other requirements of the application are detailed in § 203.9 of this part.

§ 203.8 Evaluation criteria.

The Department of Defense will begin the TAPP procurement process only after it has determined that all eligibility and responsibility requirements listed in §§ 203.6, 203.7, and 203.9 of this part are met, and after review of the specific provider qualifications as submitted in the narrative section of the application. In addition, the proposed TAPP project must meet the eligibility criteria as specified in §§ 203.10 and 203.11 of this part. Projects that fail to meet those requirements relating to the relevance of the proposed project to the restoration activities at the installation will not be approved.

§ 203.9 Submission of application.

The applicant must submit a TAPP application to begin the TAPP procurement process. The application form is included as appendix A of this part and can be obtained from the DoD installation, the DoD Component headquarters, or directly from the Department of Defense, Office of the Deputy Under Secretary of Defense for Environmental Security, 3400 Defense Pentagon, Washington, D.C. 20301-3400. The applications will not be considered complete until the following data elements have been entered into the form:

(a) Installation.
